

Fedele Canosa

“Sketching is a way to explore the space, think, test, and start to become familiar with the idea/project, to understand the possibilities, and develop the right story for my clients”.

A 20-Year Journey

This portfolio represents a curated selection of projects I have executed or designed during my 20+ year career at Mecanoo.

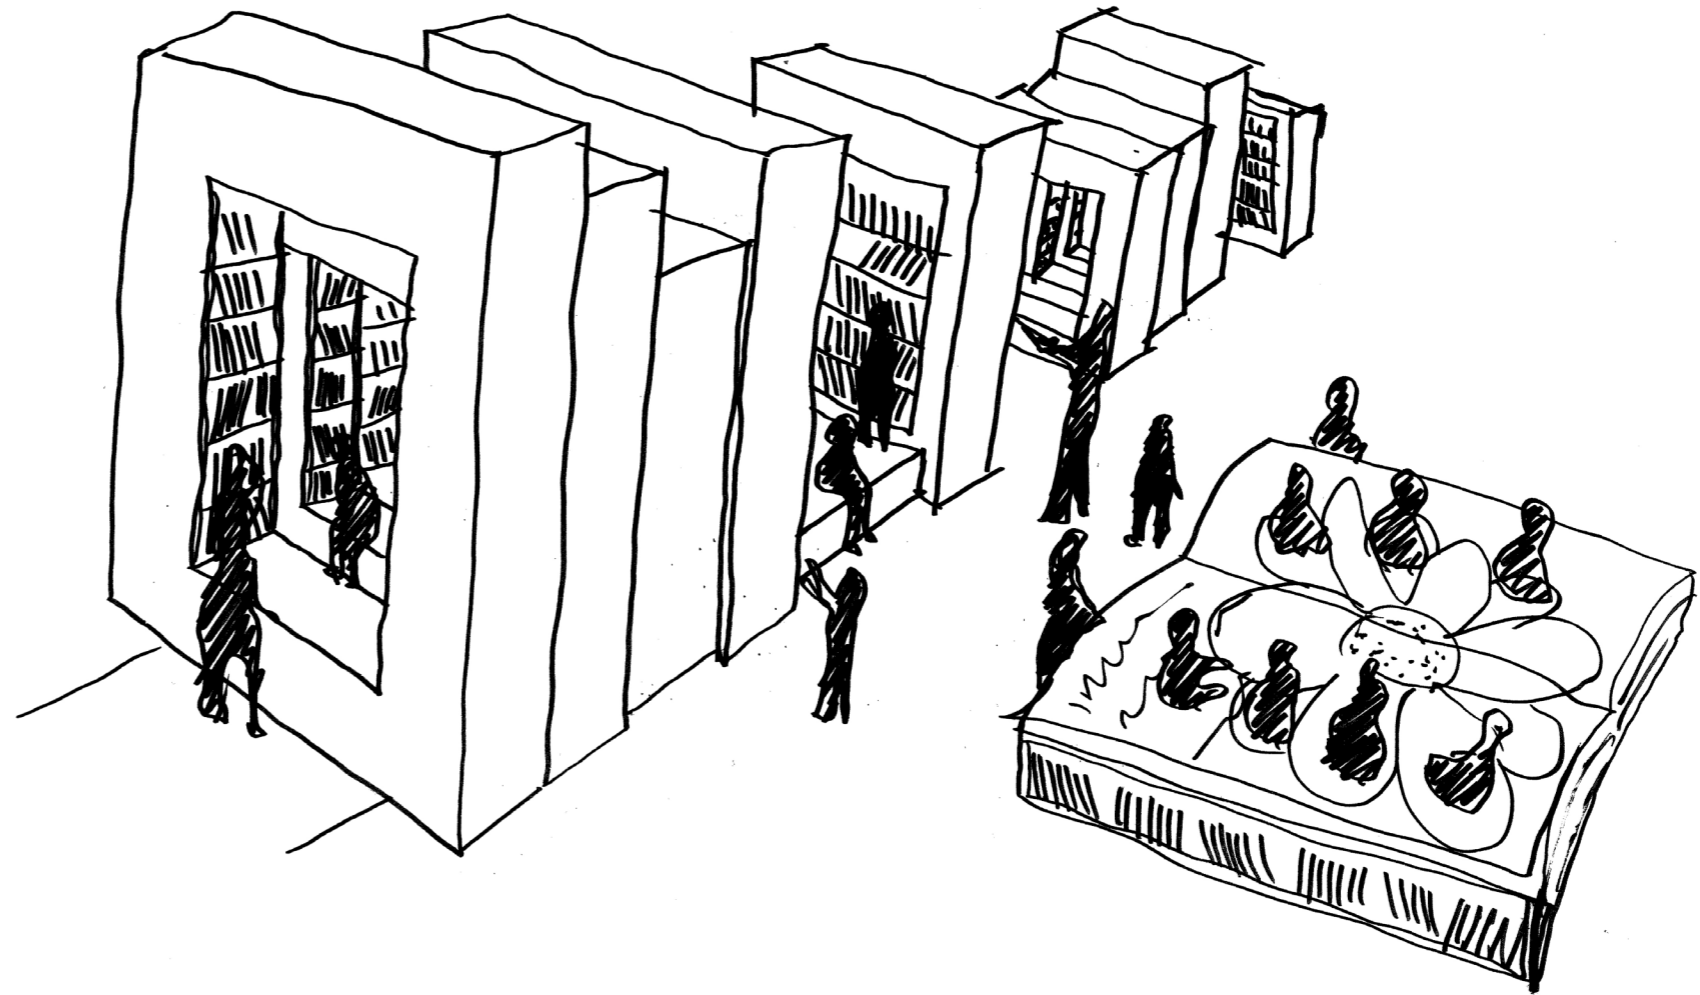

Each project showcases diverse themes, scales, and cultural perspectives, reflecting the evolution of my professional journey.

My ambition is to guide and inspire clients to explore new possibilities in their projects. Through collaboration, I strive to introduce innovative values and qualities that enhance their vision.

One of my greatest strengths lies in my ability to distil complex ideas into clear visions and directions early in the process—often through sketching.

This approach transforms abstract concepts into tangible and comprehensible solutions.

I invite you to explore my work and hope you find it inspiring!
